INTRODUCTION

This document has been developed by the National Marine Fisheries Service, National Oceanic and Atmospheric Administration, U.S. Department of Commerce (USDC) to be used as a reference for determining which fishery products have been: (1) produced in processing establishments which have been sanitarily inspected, approved, and certified by the U.S. Department of Commerce as being capable of producing safe, wholesome products, and (2) produced in accordance with specific quality regulations promulgated by the U.S. Department of Commerce.

To provide the user with a ready reference, the establishments are divided into four categories:

1. Approved for sanitation only.

2. Approved for sanitation and also produce fishery products which have been inspected and bear the official USDC Inspection and/or Grade Marks.

3. Approved for providing inspected fishery products from sanitarily approved sources for procurement by Federal Agencies.

4. Approved for sanitation and produce animal feed products.

The firms and vessels listed in this document have, at their own expense, voluntarily subscribed to USDC Federal Inspection Services and have demonstrated their ability to meet rigid standards of sanitation and the capability to produce safe, wholesome fishery products. The National Marine Fisheries Service does not infer that plants not appearing on this list fail to meet rigid hygienic standards; rather, the list is merely a compilation of those firms participating in the National USDC Seafood Inspection Program.

The document is published semi-annually and can be obtained by submitting your request to the address below stating your desire to be placed on the mailing list for the Approved List, Sanitarily Inspected Fish Establishments.

* Means no USDC grading standard currently exists.

** FDA standards of identity require that any products, USDC minimum of 50% shrimp flesh by weight and if labeled "lightly breaded" must contain not less than 65% shrimp flesh.

*** Any product with a standard of identity which contains less flesh than the standard calls for must be labeled imitation.

**** Flesh content on oyster products can only be determined on an input weight basis during production.

OFFICIAL COOKED FISH YIELDS FOR SEAFOOD

In order to assure that all users of USDC inspected fishery products are aware of the official cooked yield factors which have been approved to date for seafood products the following list has been developed for use with both standardized and non-standardized products. These factors are used when establishing the meat/meat alternate yields for USDA/FNS approved Child Nutrition statements.

These factors have been developed using standard AOAC* cooking procedures and can be used to determine seafood yield by converting the raw edible seafood weight to cooked seafood weight by multiplying the weight of raw seafood in the product by its yield factor (i.e., 2.6 oz. fish x .78 = 2.0 oz. cooked meat alternate.

Cooked yield factors for seafoods based upon standard AOAC cooking procedures are:

(1)	Products cut from regular frozen fish blocks	78%
(2)	Fresh or frozen fish fillets, skin-on or skinless	70%
(3)	Products made from frozen minced fish blocks	75%
(4)	Products made from fresh or frozen minced clams	66%
(5)	Products made from fresh or frozen minced shrimp	58%
(6)	Rehydrated dry salted cod (before cooking)	75%

Cooked yield factors for seafoods as listed in the USDA Food Buying Guide for School Food Service:

Seafood, Fresh or Frozen

(1)	Clams, shucked	28%
(2)	Crabmeat	97%
(3)	Fish Steaks, frozen	66%
(4)	Oysters, shucked, undrained	38%
(5)	Scallops, frozen	53%
(6)	Shrimp, fresh, cooked, peeled & cleaned	100%
(7)	Shrimp, frozen, cooked, peeled & cleaned	83%
(8)	Shrimp, fresh or frozen, raw, peeled & cleaned	62%
(9)	Shrimp, raw, in shell	54%

Seafood, Canned (drained wt.)

(1)	Clams, minced	43%
(2)	Mackerel	59%
(3)	Sardines	88%
(4)	Salmon	81%
(5)	Shrimp	100%
(6)	Tuna, water packed, chunk	77%
(7)	Tuna, grated or flaked	92%
